Last Updated Friday, 26 October 2007

This version contains two major improvements: ranked server support and automatic ucon connect, witch is usefully for irc bot and other features. Both features are at test stage cause i can't verify all server versions/settings and home network configurations. Feel free to post a detailed report of your problems, this could make power admin better.

Changelog

- update check

- ranked server support
- auto get external ip
- auto connect ucon
- option for public chat in console
- cpu load on server
- PunksBusted stream support

- bugfixes
